

I am voicing my right as a Deaf citizen of the United States in demanding interoperable federally-funded services for VRS calls. We should have the ability to call anyone, thru any VRS agency, without restrictions and blocking! It doesn't make sense to me that I can use a CTAP-issued TTY (different makes, models) to call through various vendors but I can't use VRS (different agencies) to call through various agencies. Please put a stop to this nonsense!
